

# Release Notes

Desktop Version: 8.2519.12

## General : 8 change(s)

### Bug Fix : 6 change(s)

#### Creditors: Payment Advice - Generating a full statement displays error

Dev Ref: 44152

Related Issue: No Issue

Addressed the issue in the Payment Advice functionality when printing a full statement on the Creditors module.

#### Diary: Booking - Incorrect patient appearing on booking

Dev Ref: 44030

Related Issue: No Issue

Addressed a diary booking issue that displayed an incorrect patient booked instead of the intended patient.

#### GXOptions: System Configuration - Error occurs when creating a new entity

Dev Ref: 43308

Related Issue: 932648, 955891

Addressed the issue where creating a new entity in System Options failed. Removed redundant options for changing the debtor prefix on the same screen.

#### MedDebs: Invoicing - Combination containing GMED set up as "Not Chargeable (Medicine)" still bills rand value

Dev Ref: 41585

Related Issue: No Issue

Addressed an issue where 'No Charge' configurations on stock items in combinations did not post correctly.

#### MedDebs: Print - VAT not included in totals for journals

Dev Ref: 43907

Related Issue: No Issue

Addressed an issue where the VAT portion of a posted journal did not display correctly on the Audit Trail.

#### MedDebs: System Speed - Performance issues resolved on new debtor structures

Dev Ref: 43896

Related Issue: No Issue

Improved performance in the Desktop diary and billing areas by addressing identified system slowdowns.

## Development : 1 change(s)

#### GXManage: Global Lists - Show complete log for changes made on Treating, Referring & Assistant Doctors

Dev Ref: 42886

Related Issue: 903270

Development to display updates to Treating, Referring, and Assistant doctor details in the entity's complete change log was completed.

## Remove Discontinued : 1 change(s)

#### GXOptions: Change - Remove "Change Debtor Prefix" function

Dev Ref: 44098

Related Issue: No Issue

Removed the 'Change' grouping from the System Options screen between the 'Reports' and 'Help' radio groups.

# Release Notes

Desktop Version: 8.2519.12

## GxPrices : 3 change(s)

### Bug Fix : 2 change(s)

#### GXManage: Pricelist Management - Issue with linking on cloned pricelists

Dev Ref: 44060

Related Issue: No Issue

Addressed the issue where cloned pricelists did not consistently retain their contract profile links when linked to another entity and updated with a new pricelist version.

#### GXManage: Pricelist Management - Modifier not saving 5th percentage field accurately locally

Dev Ref: 44042

Related Issue: No Issue

Addressed an issue where the fifth deduction percentage field was not saved correctly when configuring deduction modifiers.

### Development : 1 change(s)

#### GXManage: Pricelist Management - Additional changes to local contract name management

Dev Ref: 43825

Related Issue: No Issue

Development has been completed so that the local pricelist contract description now displays the pre-2026 name for GoodX-managed contracts. Users can also enter notes for locally managed contracts.

## Hospital : 4 change(s)

### Bug Fix : 3 change(s)

#### Hospital: Cases - Fixed Fee not triggered on finalisation

Dev Ref: 41232

Related Issue: 907828

Addressed the issue where the fixed fee was not applied when finalising cases from the Case Management Screen. Added functionality to finalise and generate final invoices for single or multiple cases directly from the Case Management Screen. Note: Only discharged cases are affected.

#### Hospital: Pricelist Management - "Copy Per Diem lists from Previous Years" function displays SQL error

Dev Ref: 44097

Related Issue: No Issue

Addressed the issue that would occur when using the "Copy Per Diem lists from Previous Years" function.

#### Hospital: Print - Consolidated Case Report display issue

Dev Ref: 43311

Related Issue: 933545

Addressed the issue where delays occurred when printing the Consolidated Case Report.

### Development : 1 change(s)

#### Hospital: MedDebs - Add an Age Analysis parameter "Per Case Type"

Dev Ref: 43620

Related Issue: 899450

The Age Analysis report now features a "Per Case Type" option, giving hospitals the ability to view age analysis by each case type.
