

Release Notes

Desktop Version: 8.2519.13

Goeie dag vanaf die myGC span

Wees asseblief bewus dat vanaf GXWeb weergawe 1.19.13 skuif die Online Presence vanaf die dagboek settings na die Configuration settings.

(Kan gevind word op die GXWeb Wiel)

Ons gaan ook vanaf weergawe 1.19.13 n nota onder die dagboek settings los om vir die gebruiker aan te dui dat die Online Presence geskuif het na Configuration settings toe.

Vriendelike Groete

Good day from the myGC team

Please take note that from GXWeb version 1.19.13 the Online Presence will move from diary settings to the Configuration settings.

(Which can be found on the GXWeb wheel)

We will also add a disclaimer from version 1.19.13 at the bottom of the diary settings to indicate to users that the "Online Presence" has moved to the Configuration settings.

Kind Regards

Release Notes

Desktop Version: 8.2519.13

General : 1 change(s)

Bug Fix : 1 change(s)

Diary: Booking - Incorrect patient appearing on booking

Dev Ref: 44030

Related Issue: No Issue

Addressed a diary booking issue that displayed an incorrect patient booked instead of the intended patient.

GxPrices : 3 change(s)

Bug Fix : 2 change(s)

GXManage: Pricelist Management - "Contracts: Choose" screen closes when user tries searching contract name

Dev Ref: 44113

Related Issue: No Issue

Addressed an issue where the filter functionality on the medical aid contract screens were not functioning as expected. Filters now apply accurately and consistently across all medical aid contract views.

MedDebs: Invoicing - Referenced pricelist not populated when private switch is enabled

Dev Ref: 44043

Related Issue: 956076

Addressed an issue where compound billing groups incorrectly applied the base price rather than the referenced price when the medical aid option was configured to switch privately.

Request : 1 change(s)

GXManage: Pricelist Management - Change "Update Local Description" to "Update Local Pricelist Description"

Dev Ref: 44308

Related Issue: No Issue

Renamed the 'Update Local Description' menu label to 'Update Local Pricelist Description' to more accurately reflect its function and improve navigation clarity.

Stock : 1 change(s)

Bug Fix : 1 change(s)

Stock: Stock Setup - Error when using "Mark Zero-level items as inactive" function

Dev Ref: 43776

Related Issue: No Issue

Addressed the error a user would receive when marking zero-level items as inactive.
