Release Notes

Release Version : 2.19.0

General : 2 change(s)

Bug Fix : 1 change(s)

Operation: Medical Aid - Remove the 10-item limit and reorder the list to display discontinued option to the bottom

Dev Ref: 45170

Support Ref #: 983224

Addressed the issue where search results were limited; the system now displays all medical aid and option information, with discontinued options sorted to the bottom of the list.

Development : 1 change(s)

Theatre List: Operations - Enable operation resyncing

Dev Ref: 45409

Functionality has been enhanced to enable automatic resyncing of operations when operation details are updated.

Release Notes

Release Version : 2.19.0

GXC : 2 change(s)

Bug Fix : 2 change(s)

Dashboard: Pathology - Improved loading speeds for pathology order forms and enhanced PDF document access

Dev Ref: 45133

Addressed the issue where the pathology page was slowed down by loading all documents at once. The page now loads quickly, and PDF documents are now retrieved only when you choose to view or download them.

Register: Success message displays placeholder text instead of a proper confirmation message

Dev Ref: 41836

Addressed the issue where the registration success message displayed placeholder text instead of a proper confirmation message.
