

Release Notes

Web Version: 1.18.31

General : 2 change(s)

Bug Fix : 1 change(s)

GXWeb: Invoicing - Assistant code 0009 unit calculation corrected

Dev Ref: 45564

Related Issue: 989871, 997241

Addressed an issue where assistant code 0009 was calculated incorrectly on the web app:

- The unit amount no longer defaults to the minimum of 32 units.
- The calculation now matches the desktop application when assistants are applied.

Additionally, addressed an issue with row ordering when reduction modifiers are used on the web app:

- Tariff codes now display in the correct sequence after applying modifier 0005.
- Invoice totals and code ordering now align with the desktop application.

Request : 1 change(s)

Configuration: Workflow Event Configuration - Text fields available for AI on the WCA forms

Dev Ref: 45492

Related Issue: 992128

All text fields within WCA, FEM, and RMA workflow events have been enabled for AI integration.
