Diary: Clinical - Ability to add current event on GoodXpert

Dev Ref: 45317

Related Issue: No Issue

Functionality has been enhanced to use the current event as GoodXpert context from WFE actions.

Diary: Clinical - Update Quick Report Layout of the Printout

Dev Ref: 45172

Related Issue: No Issue

The following printout layout changes have been made to the Quick Report workflow event:

- Added the Date next to the Patient Details section
- Added the signature to the bottom of the printout
- Removed the Treating Practitioner Signature label

Diary: Express Booking - Add additional fields to the patient section on express bookings

Dev Ref: 45166

Related Issue: No Issue

Functionality has been adjusted to add additional fields to the patient section on Express Bookings.

GxNavigation: Renamed Accounting module to 'Administration'

Dev Ref: 41076

Related Issue: No Issue

Functionality has been adjusted to rename the Accounting module to 'Administration'.

Theatre Manager: Theatre List - Improve drag-and-drop functionality for operation booking

Dev Ref: 45300

Related Issue: No Issue

Functionality has been enhanced to allow drag-and-drop rescheduling of operation bookings with confirmation via the Operation Workflow Event.

General : 8 change(s)

Bug Fix : 6 change(s)

Communication: Tasks - Print and download task error

Dev Ref: 43869

Addressed the issue causing errors when printing or downloading tasks.

Related Issue: No Issue

Communication: Tasks - Resolve rendering for tasks Kanban view screen

Dev Ref: 41125

Addressed the issue where the Tasks Kanban view screen did not render correctly.

Related Issue: No Issue

Debtors: Debtors Edit - Medical Aid List failed to prompt Add New button

Dev Ref: 44686

Addressed the issue where the Medical Aid List functionality failed to prompt the Add New button.

Related Issue: 971257

Diary: Clinical - Update booking type based on triage, disposal and billing codes on EMR Workflow Event

Dev Ref: 44161

Addressed the issue where the clinical diary booking type did not automatically update according to the triage, disposition and billing codes processed within the EMR Workflow Event.

Related Issue: No Issue

Diary: Diary Types - Ability to see patient name in multi-day view for theatre bookings

Dev Ref: 43759

Addressed the issue where patient names were not visible in the multi-day view for theatre bookings.

Related Issue: 944955

Diary Settings: Booking Status Setup - Error when trailing space in Booking Status Name

Dev Ref: 45052

Addressed the issue where a trailing space in the Booking Status name caused an error.

Related Issue: No Issue

Development : 1 change(s)

Configuration: Workflow Event Configuration - Create a Quick Report WFE

Dev Ref: 45289

A new workflow event, namely the Quick Report workflow event, has been added to enable users to quickly generate a simple, condensed report for patients.

Release Notes

Web Version: 1.19.16

Diary: Clinical - Update Quick Report layout of the printout

Dev Ref: 45288

Related Issue: No Issue

Updated the Quick Report layout with the following changes:

- Added a date field next to patient details
- Added the practitioner signature to the footer
- Removed the 'Treating Practitioner Signature' label

Hospital : 2 change(s)

Request : 2 change(s)

Hospital: Cases - Case List screen to display pre-admitted cases

Dev Ref: 45237

Related Issue: No Issue

Functionality has been enhanced to display pre-admitted cases on the Case List screen.

Hospital: Hospital Cases - Ability to reallocate receipts on case screen for transactions only linked to case

Dev Ref: 45351

Related Issue: 989227

Receipt Allocation and Reallocation functionality has been adjusted and refined to ensure that the transactions displayed are contextually relevant (case or debtor) and correct.

- Case-Specific Focus: When allocating or reallocating receipts directly from a Case Screen, the system now filters the view to show only transactions linked to that specific case. Transactions belonging to other cases for the same debtor are hidden to prevent accidental misallocation.
- Comprehensive Debtor View: To view a debtor's full financial picture, users can still perform allocations from the Debtor Screen. This view continues to display all transactions across every case associated with that debtor.

mygc : 1 change(s)

Bug Fix : 1 change(s)

Consent Form: Enable 'Clear' option for questionnaires' correct answer selection

Dev Ref: 44365

Related Issue: No Issue

Addressed the issue where the questionnaire on consent forms required a specific correct answer to be designated for all radio button questions. Users can now deselect or clear a 'correct answer' selection, allowing questions to be neutral with any response considered valid.

Stock : 3 change(s)

Bug Fix : 2 change(s)

Creditors: Stock Invoice - Purchase Default Warehouse should display for a Stock Invoice

Dev Ref: 45308

Related Issue: No Issue

Addressed the issue where the warehouse did not default to the configured Purchase Default Warehouse.

Release Notes

Web Version: 1.19.16

Stock: Creditors - Slow loading of active and inactive stock items

Dev Ref: 45279

Related Issue: 986699

Addressed an issue where displaying both active and inactive stock items caused slow loading times.

Request : 1 change(s)

Stock Setup: Stock Items - Add 'Note' field to Add/Edit Stock Item screen

Dev Ref: 35633

Related Issue: No Issue

Updated the Add/Edit Stock Item screen under Stock Setup to include a new 'Note' field. This allows users to record and track additional comments or details for each item.
